## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2004/001749

**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims 2-23	YES
	Claims 1	NO
Inventive step (IS)	Claims	YES
	Claims 1-23	NO
Industrial applicability (IA)	Claims 1-23	YES
	Claims	NO

## 2. Citations and explanations (Rule 70.7)

GB 2274131, WO 1990/002229, US 2003/016996

**Novelty & Inventive step - Claims 1 – 23**

The first two citations disclose vehicle barrier gates that fall within the broad scope of claim 1, which includes features such as a lower reinforced structure, an upper structure, both extending across a roadway (no mention of a sliding gate), spaced reinforcing means (buttresses), such that the buttresses provide added strength to the barrier when a vehicle impacts upon it.

Hence, claim 1 is not novel and lacks an inventive step.

The remaining claims define sliding gates, structures of the lower reinforced structure, and other features that are very similar to what is seen in the citations. For example, the structure of the lower beam in the WO citation has two spaced linear members (eg claim 2), these members being I-beams (eg claim 4), but cross bracing is not visible. It is not apparent this WO citation needs the cross bracing, hence the structure disclosed would be structurally equivalent to that currently claimed.

Similarly, other features of further claims are disclosed, eg, buttresses, rollers etc, but not exactly as claimed. Though it is apparent they do form similar structures to function in similar ways.

Hence, claims 2-23 are novel but lack an inventive step.
